W. P. RICHARDSON.

KIDNEY DISEASES

are the most fatal of all dis-
eases.

FOLEY'S KIDNEY CURE is a
Guaranteed Remedy

or money refunded. Contains
remedies recognized by emi-
nent physicians as the best for
Kidney and Bladder troubles.

PRICE 50c. and \$1.00.

Sold by H. C. CRUTE.

Cafelerian
CURES HEADACHE.

AND IT STAYS CURED.

Cafelerian is pleasant to the taste, is harmless, is no secret nostrum,
is highly recommended by physicians, and does absolutely cure headache.
Cafelerian leaves no unpleasant effect. It braces the nervous system, invig-
orates the mind, relieves mental exhaustion, and cures insomnia. As a
liquid and as an effervescent salt.

At drug stores and soda fountains. Trial
bottles 10 cents.

Cafelerian
CURES HEADACHE.

Sold by H. C. CRUTE.

2,000 POUNDS

Bacon cured by Mr. H. E. Rich-
ardson.

1 car of Corn and 1 car of Oats
guaranteed to be

LEAN AND SOUND.

Also fine lot Seed SWEET and IRISH POTA-
TOES.

Over-Work Weakens Your Kidneys.

Unhealthy Kidneys Make Impure Blood.

All the blood in your body passes through
your kidneys once every three minutes.
The kidneys are your
filter out the waste or
impurities in the blood.
If they are sick or out
of order, they fall to do
their work.

Pains, aches and rheu-
matism come from ex-
cess of uric acid in the
blood, due to neglec-

tion.

Kidneys trouble causes quick or unsteady
heart beats, and makes one feel as though
they had heart trouble, because the heart is
over-working in pumping thick, kidney-
poisoned blood through veins and arteries.

It used to be considered that only urinary
troubles were to be traced to the kidneys,
but now modern science proves that nearly
all constitutional diseases have their begin-
ning in kidney trouble.

If you are sick you can make a mistake
by first doctoring your kidneys. The mild
and the extraordinary effect of Dr. Kilmer's
Swamp-Root, the great kidney remedy is
soon realized. It stands the highest for its
wonderful cures of the most distressing cases
and sold on its merits
by all druggists in fifty-
cent and one dollar
bottles. You may have a
sample bottle by mail
free, also pamphlet telling you how to find
out if you have kidney or bladder trouble.
Mention this paper when writing Dr. Kilmer
& Co., Birmingham, N. Y.

Don't make any mistake, but remember
the name **Swamp-Root**, Dr. Kilmer's
Swamp-Root, and the address, Birmingham,
N. Y., on every bottle.

The famous little pills.

CROP VALUES RAISED. Intense Cultivation of Small Farms Has Proved of Benefit to New England Agriculture.

Farmers in thickly settled districts
are naturally to concentrated or "in-
tensive" farming. They have high-
priced land, manure cheap and plenty,
and almost unlimited markets for the
best grades of fresh produce.

The result is shown conspicuously
in a state like Massachusetts, says the
Massachusetts Ploughman, where 87
per cent. of the people live in cities
and where, by the rapid increase of
population during the last 20 years, the
farmers' near-by market has increased
three times and one-half times. In the state
mentioned the number of acres cul-
tivated has, according to the statistics of
Prof. Waugh, decreased 22 per cent., and this alongside the great enlarge-
ment of the market. Most of the land thus
gradually abandoned was not
suited for high-grade tillage crops and
has been left to pasture and forest
growth. On the other hand, the
amount of farm products has in-
creased 51 per cent. In other words,
Massachusetts farmers raise one-half
more produce on three-fourths the area
as compared with 20 years ago. Thus
the working farms have grown
smaller while the crops have grown
larger and more valuable. The greater
part of this change is evidently in the
farming regions in close touch
with city markets. The more remote
sections show fewer changes in 20
years, yet the same tendency to con-
centrate efforts on the best land is
everywhere noted.

Specialization is another influence
which has raised crop values. Farming
under cloth, gardening under glass,
drainage, heavy manuring and all the
various methods of high pressure agri-
culture have all done their part. The
farmers of the thickly settled regions
have become largely gardeners, mills
producers, fruit growers and the like,
and the old-time, all-around farmer is
in the minority. This tendency is from
most points of view to be com-
mended. It tends to remove the farmer
from distant competition, to help
him learn to raise at least one product
well, to increase his skill and general
intelligence, and to increase the aver-
age of profits.

BUDS ON FRUIT TREES.

How Twigs Having Bloom Buds Can
Be Distinguished from Those
That Have Not.

The fruiting buds of the apple are
borne on short, stubby branches or
spurs, well shown in the cut. The
branches on the right of each group in
the cut have bloom buds, while those
on the left carry only leaf buds, and
are such as would be selected for graft-
ing or budding. Apple bloom buds are
large and thick in comparison with the
leaf buds, and the spurs which carry them
are seldom found on wood less

FLOWER AND LEAF BUDS.
(Branches on the Right of Each Group
Carry Bloom Buds.)

than three years old. When cutting
apple grafts we like to select straight
smooth twigs of one or two seasons'
growth, not much thicker than an ordinary
lead pencil. Such growths are
free from spurs or fruit buds, and make
first-class scions. The cut also shows
branches of a Japan plum and of the peach,
bearing leaf buds alone and leaf
and bloom buds respectively. The
plum fruit buds are in clusters on short spurs,
but in the peach they are borne singly or in pairs alongside leaf
buds on wood of one season's growth.

Preparing Soil for Orchards.
Many an apple orchard proves to be
a failure because it is put on land
without the ground being put into
a suitable state of preparation to
bear an orchard. Drainage is one of
the first requisites for successful
orcharding. This is especially true
on heavy clays. It is an error to
suppose that hillsides do not need
drainage. We have known gradual
slopes that required drainage to per-
mit the water to drain away from
the roots of the trees in a reasonable
time after a heavy rain. Some
soils are of such texture that the
water will be held around the roots
of trees for days after heavy rains.
Such conditions must not be allowed
to remain—Farmers' Review.

Lucky Thirteen.

Patience—Did you say she is about
to take her thirteenth husband?

Patrice—Yes, I did.

"Isn't she at all superstitious?"

"Oh, yes; but she knows her thir-
teenth can't be any worse than the other 12."—Yonkers Statesman.

It Would Soothe.
Father—I wonder what's the matter
with Nellie this morning. She acts
like one possessed.

Mother—She probably is. I noticed
a new ring on her finger when she came
downstairs.—Philadelphia Bulletin.

Midland Farmer.

Exports of Farm Products.

According to a report from the
United States treasury department,
the chief reduction in exports during
the year is in agricultural products,
which show a decrease of \$120,000,-
000, of which \$80,000,000 value is in
breadstuffs; \$24,000,000 in provisions;
\$19,000,000 in animals, and \$10,000,000 in
cotton; while tobacco shows an in-
crease of about \$8,000,000, and fruits
and nuts an increase of about \$7,-
000,000. This increase of \$7,000,000
in the exportation of fruits is chiefly
to the United Kingdom, showing an
increase of nearly \$5,000,000; and to
France and Germany, each showing
an increase of over \$1,000,000.

The First Introduction.

Madam;

You're Eve;

I believe;

—Buffalo News.

THE DRAWBACK.

She—He talks like a book.

He—Ye-e-s—but you can't shut him

An Artful Dodger.

Miss Elderliegh—I never yet saw the

man who would marry me.

Miss Youngun—Indeed! But then I

suppose she saw you first.—Cincinnati

Enquirer.

The other theory which we draw

Herald and N. Y. World, \$1.00.

from the argument is: A tree which is planted deep is more able to withstand drought, cold and the other elements, and in this way the production is increased. We shall make a number of trial plantings this year, and give this method a thorough test. We would like to hear from fruit growers who have made observations along this line.

WINDOW GARDEN ANNEX.

Here is a Description of an Arrangement
suitable for Use the Year Around.

Not everyone can have a green-
house, but a small window garden
is easily within the reach of every
thrifty and up-to-date farmer. The
frame is easily made as shown in the
cut, and is fastened over a window
on the outside of a house, by strong
iron brackets underneath, being as

farmer's house quick or unsteady

heat, and makes one feel as though
they had heart trouble, because the heart is
over-working in pumping thick, kidney-
poisoned blood through veins and arteries.

It used to be considered that only urinary

troubles were to be traced to the kidneys,

but now modern science proves that nearly

all constitutional diseases have their begin-
ning in kidney trouble.

If you are sick you can make a mistake
by first doctoring your kidneys. The mild

and the extraordinary effect of Dr. Kilmer's
Swamp-Root, the great kidney remedy is

soon realized. It stands the highest for its

wonderful cures of the most distressing cases

and sold on its merits

by all druggists in fifty-
cent and one dollar

bottles. You may have a

sample bottle by mail
free, also pamphlet telling you how to find

out if you have kidney or bladder trouble.

Mention this paper when writing Dr. Kilmer

& Co., Birmingham, N. Y.

Don't make any mistake, but remember

the name **Swamp-Root**, Dr. Kilmer's

Swamp-Root, and the address, Birmingham,
